The Northeast Corridor, or the NEC for short, is a major artery of travel and business in the U.S., carrying hundreds of thousands of people on a daily basis. New York and New Jersey are at the heart of the NEC, where people utilize Amtrak and NJ Transit to commute to and from New York Penn Station. The current NEC infrastructure is at a turning point, requiring new funding for a variety of rail projects, including two, new Hudson River Tunnel tubes and rehabilitation of the existing 109-year old tunnel. Should the massive rail infrastructure undertaking not move forward, the entirety of NEC travel could come to a grinding halt.
